SKILLS

 React.js

 Javascript

 CSS

 HTML

 Node.js

 Firebase

 MongoDB

 Git

PROJECTS

Free Speech Geek Blog & Podcast Platform

github.com/Free-Speech-Geek/FSG-React

React, Wordpress, Sass

- Provides a central hub for all client content relating to conventions, anime, cosplay, and entertainment
- Utilizes the Wordpress REST API and a custom hook to fetch client’s content and data for the frontend
- Optimizes UX by using the Context API and Local Storage to persist content across routes and refreshes

Weam Rec Sports Player-finder

github.com/joshcamp503/weam

React, Firebase, Google Cloud Functions, Material UI, Nodemailer, Formik, Yup

- Streamlines the process of finding substitute players for recreational sports team managers
- Firebase Auth provides users with secure profiles where they can add their preferred sports contacts
- Users submit a “Sub Request” form to Firebase and Google Cloud Functions emails all chosen recipients

IP Locator IP Address Geolocator

github.com/Maxisab/ip-address

Leaflet.js, ipify API, Fetch API, Vanilla Javascript, CSS, HTML, Responsive Design

- Displays location data of any IP address entered into the search bar or location clicked on the map
- Map functionality provided by Leaflet.js library
- Used vanilla Javascript to fetch data from IPify API using information from IP Locator client and Leaflet.js
